OPTOMAP RETINAL EXAM

In our continued effort to bring the most advanced technology to our patients, we are proud to announce the inclusion of the Opto-map Retinal Exam as an integral part of your exam today.

Dr. Turk is concerned about retinal problems including macular degeneration, glaucoma, retina holes or detachments, and systemic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious health problems, including partial loss of vision or blindness, and often develop without warning and progress with no symptoms.

An Opto-map Retinal Exam provides:

- **An in-depth view of the retinal layers where diseases can start.**
- **The ability for you to view your Opto-map image at the time of your exam.**
- **An annual permanent record of your images to be included in your medical file. This gives Dr. Turk a comparison for tracking and diagnosing potential eye disease.**

Insurance typically does not cover any advanced screening technology beyond the general exam. Dr. Turk highly prefers the Opto-map Retinal Exam for all patients. This will be done as an enhancement to the general eye exam for a fee of \$35.
